DISRUPTION OF WATER SERVICE NOTICE

Beginning on 04/25/2024 as part of the Park Avenue Relocation Phase 1, a State of Delaware project, contractors will need to temporarily shut down the water main.

Only the following properties will be affected by the shutdown:

427 S Bedford St
429 S Bedford St
433 S Bedford St
437 S Bedford St
439 S Bedford St
503 S Bedford St
505 S Bedford St
507 S Bedford St
509 S Bedford St
510 S Bedford St
511 S Bedford St
513 S Bedford St
21731 Zoar Rd
21737 Zoar Rd

If your property is not listed above you are not impacted by this notice.

The shut down time will begin at 10:00 p.m. The water main will only be shut down for a short period, then once completed, the water will be restored. Thank you for your cooperation. If you have any questions please contact Jeff Ward, Construction Coordinator at (302) 448-0542.

DRINKING WATER WARNING

Georgetown Water Department

BOIL YOUR WATER BEFORE USING

Increased Risk from Microbial Contamination

On Thursday, April 25, 2024, there will be a planned disruption in the water service causing a loss of positive water pressure in our distribution system. A loss of positive water pressure is a signal of the existence of conditions that could allow contamination to enter the distribution system through back-flow by back-pressure or back-siphonage. As a result, there is an increased chance that the water may contain disease-causing organisms.

What should I do?

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a rolling boil, let it boil for one minute, and let it cool before using. Alternatively, bottled water may be used. You should use boiled or bottled water for drinking, making ice, washing dishes, brushing teeth, and food preparation until further notice.

Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.

These symptoms, however, are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, seeking medical advice is recommended.

People with severely compromised immune systems, infants, and some elderly may be at increased risk. These people should seek advice about drinking water from their health care providers. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at (800) 426-4791.

What happened? What is being done?

We will inform you when all corrective actions have been completed and when you no longer need to boil your water.

For more information, please contact Bobby Fletcher at 302-856-7391 or Kevin Cottman, Environmental Health Specialist III with the Office of Drinking Water at 302-741-8630.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the Georgetown Water Department. **Please see Disruption of Water Service notice for affected properties.**
