Georgetown Snow Emergency Plan Activation

Parking restrictions in effect starting at 5:00 PM Today

Georgetown – With the forecast of significant snow and the issuance of a Blizzard Warning for the Georgetown area, effective today, February 22, 2026, at 5:00 PM, the Town of Georgetown will activate its snow emergency plan.

Starting at this time, parking restrictions will apply to designated snow emergency routes, making it easier and more effective for equipment to clear snow from the streets.

The designated snow emergency routes are:

- Market Street (East and West)
- Bedford Street (North and South)
- Bridgeville Road
- Pine Street (East and West)
- Race Street (North and South)
- Front Street (North and South)
- East Laurel Street – North Bedford Street to North Race Street
- West Laurel Street – North Bedford Street to North Front Street
- Edward Street – North Bedford Street to North Front Street
- West North Street – North Bedford Street to DuPont Highway (Route 113)
- Albury Avenue – East Market Street to Cedar Street

Vehicles parked along these streets may be subject to towing, at the owner's expense, if not removed by the owner. As a reminder, please minimize on-street parking to allow for efficient snow removal. Residents are asked to avoid traveling during adverse weather conditions. Those who must travel are asked to use caution around snow removal equipment and personnel.

Town ordinances state that the sidewalks be cleared within 24 hours after a snowfall and depositing of snow into Town Streets is prohibited. Residents with a fire hydrant near their property are asked to take an extra minute or two to ensure that it is clear and visible.

Residents with questions about the snow emergency can log on to the Town's website – www.georgetowndel.com for more information or call the Town offices at (302) 856-7391.
